

HB 1022 -- Concealed Firearms on Business Premises

Sponsor: Jones (50)

This bill specifies that any private business that displays signage prohibiting public invitees, business visitors, and employees from carrying a concealed weapon on the premises will be liable for any injury or damages incurred as a result of the prohibition if an invitee, visitor, or employee establishes by a preponderance of evidence that access to a firearm may have prevented his or her injury or damage. Any business that does not prohibit public invitees, business visitors, and employees from carrying a concealed weapon on the premises will be immune from any liability arising from its decision to permit concealed weapons to be carried on the business premises.
